

United's FS&T Research Council

John C. Beaulieu, Ph.D.

United States Department of Agriculture, Agricultural Research Service, Southern Regional Research Center, 1100 Robert E. Lee Blvd, New Orleans, LA 70124

3 "Research" Priorities

- Research Priorities
- Communication
- Collaboration

Research Priorities

- Tabulate current literature hits to pin-point "hot topics". What is known and to be a "clearing house"
- Form a web-based site for current and future R&D by Researchers and Industry players
- United & the FS&T Council need to organize and prioritize research needs
- Align and determine commonalities between various Centers for Food Safety (Rutgers, UCD, GA, Purdue etc.)

Communication

- Develop broad-based Industry & Trade Organization seminar series to address current "hot topics" of R&D
- Boil down R&D findings into common English; Make it available to the public

Collaboration

- Facilitate specific field/farmer to work on specific research project with a specific researcher(s)
- UFPA & interested Industry members should sponsor a competitive yearly grant to fund one proposal (Researcher with Industry partner) to address one highly specific "hot" research topic. Results to be presented next S-294
