Director's Update

2013 Brings New Opportunities

The loss of our dear friend and colleague, Adel Kader, has been keenly felt over the past few weeks since we first learned of his death. His scope of influence was incredibly broad, and he had a remarkable ability to strategically focus his efforts to have the greatest impact whether it was on the UC Davis campus, or through his international humanitarian efforts.

We hope that many of our friends and colleagues will be able to join us at his Memorial Service which will be held on Saturday, Jan. 26, 2013, at the Buehler Alumni and Visitors Center located on the UC Davis campus. There will be a luncheon reception at 11 a.m., memorial service at 1 p.m., and post-reception at 3 p.m. The Kader Family has requested that in lieu of flowers, any memorial gifts be made to the Postharvest Program Endowment Fund. Additionally, they have created an Adel Kader Memorial Facebook page, and welcome your thoughts and photos.

Produce Professional Certificate Program

Our team has been working hard to put the finishing touches on our new Produce Professional Certificate program. This exciting, first-of-its-kind, certificate program will be of interest to those in the produce industry who want to enhance their produce knowledge and boost their credibility with a Produce Professional Certificate from the UC Postharvest Technology Center. Participants work to earn a minimum of 120 points through attendance at several mandatory on-site courses and optional courses and on-line modules selected on an a-la-carte basis within a four year period, and must pass an exam after each course. A registration fee of $2,500, plus individual course fees, is required for the certificate program.

This certificate will equip individuals with a set of tools representing all aspects of postharvest handling. Enrollment for the certificate program will open February 1, 2013: http://postharvest.ucdavis.edu/Education/Produce_Professional_Certificate.

Postharvest Workshops at UC Davis

Three Educational Opportunities: NOW accepting enrollments
NEW SHORT COURSE! Emerging Postharvest Technologies
We’re pleased to announce the opening of enrollments for the first offering of the March 14-15, 2013 Emerging Postharvest Technologies workshop. Busy produce professionals from California and beyond will benefit from this short course, presented in a shortened, interactive, and more convenient time format. Cutting-edge information on current produce trends, such as nanotechnology, superfoods, improving automation and packaging, and more will be discussed. This exciting new course is supported by the UC Division of Agriculture and Natural Resources (ANR), the Postharvest Technology Center, and UC Davis Department of Plant Sciences. The enrollment fee of $775 will include all instruction, course materials, coffee breaks, lunches, and an evening networking reception. For more information or to register, please visit the workshop’s web page.

Fruit Ripening & Retail Handling Workshop Focuses on Quality
Coordinated by Dr. Carlos Crisosto, the March 18-19, 2013 “Fruit Ripening and Retail Handling” workshop will be held on the UC Davis campus, and will focus on how to increase profits by reducing losses at the receiving end, and delivering ready-to-eat, delicious fruits and fruit-vegetables to the consumer.

The cost of the workshop is $775, and registration includes all instruction, breakout sessions, demonstrations, course materials, coffee breaks, lunches, and an evening networking reception. Sensory, quality measurements, and environmental equipment demonstrations will be held, and lectures will include topics such as maturity and quality relationships, retail temperature storage conditions, tools to control ripening and senescence, physiological disorders and other losses, and ripening facilities and equipment.

To learn more about this workshop, or to register, please see the web page: http://postharvest.ucdavis.edu/Education/fruitripening/

Enrollments are Strong for the June 2013 Postharvest Technology Short Course
The 35th Annual Postharvest Technology Short Course will be held June 17-21, 2013, with the optional field tour being held the week of June 24-28. The course is an intensive study of the biology and current technologies used for handling fruits, nuts, vegetables and ornamentals in California. It is designed for research and extension workers, quality control personnel and other professionals interested in current advances in the postharvest technology of horticultural crops.

Registration for the complete 2-week session (lecture-labs session plus the optional field tour) will cost $2895 and is limited to 55 participants. Registration for the first week (lecture-labs only) session will cost $1895. An additional lodging fee must be paid by all participants going on the field tour. Registration often fills up early, and registrations are made on a first-come, first-paid basis. For complete information or to register for this world-renown course, please link to: http://postharvest.ucdavis.edu/Education/PTShortCourse/

We hope you will plan to join us for all of these top notch educational opportunities!
25% Discount on “Fruit Ripening and Ethylene Management” Binder

Through the month of January we are offering a 25% discount on the “Fruit Ripening and Ethylene Management” binder. This binder is the course material for our annual Fruit Ripening and Retail Handling workshop. The regular price for the binder is $75; with the 25% discount the price is $56.25!

This in-depth resource includes information about ripening pears, bananas, kiwifruit, stonefruit, and avocados, degreening citrus and much more. Please link to this web page for the table of contents and additional information about ordering this publication.

We invite you to order a copy for your library today. U.S. and Canadian addresses only please use our online store, and international addresses please use our printed order form.

Postharvest Endowment Contribution

A Heartfelt Thank You

We are very appreciative of the generous gifts received through the end of December 2012 from the following endowment contributors. All gifts were given in memory of Dr. Adel A. Kader:

COMPANIES
Silver Category
Catalytic Generators LLC
Dole Food Company

Patron Category
P.E.B. Commodities

Century Club Category
Holcroft Postharvest Consulting

INDIVIDUALS
Patron Category
Ruth E. Berry
Kaz Kawada
John M. Labavitch
Beth Mitcham & Steve West
Joan Rosen
L. George & Claudia Wilson

Century Club Category
Mary Lu Arpaia
Katherine Gregory
Betty Hess-Pierce
Richard & Joann Larkey
Keri Morrelli
Edward & Mabelle Price
Bill & Mary Reed
Michael & Nancy Reid
Cindy Tong
Mike Urkov
Bruce D. Whitaker

Contributor Category
Chika Ando
Denise Bohart-Brown
Linda Harris
Janine Hasey
Sandra Landahl
Elizabeth M. Lowry
Gale McGranahan
Donald W. Schaffner
Yoshimi & Alley Watada

We are truly appreciative of all additional contributions, which may be designated to the endowment fund, or in support of scholarships for deserving individuals to attend our workshops or courses.

To make a contribution to the Postharvest Program Endowment fund in memory of Dr. Adel Kader, or to assist with providing a scholarship, please visit our Make a Gift web page.
Cook was Invited Speaker at National Onion Association
Dr. Roberta Cook presented a talk about the “Fundamental Forces Affecting U.S. Fresh Produce Growers and Marketers” on November 29, 2012 at the National Onion Association’s annual meeting, which was held in Rancho Mirage, California.

What’s New on Our Website
Need Postharvest Information? Most Useful Postharvest Websites
We invite you to check out our comprehensive listing of the most useful and unrestricted internet sites for postharvest information. It is organized by categories, including: comprehensive postharvest handling resources (including our site!); global postharvest handling; other university and commodity specific postharvest handling; quality standards; pesticides, additives, organics, and quarantine requirements; nutrition; and food safety, traceability, and defense.

If you have suggestions for additional useful sites, please forward them to Dr. Marita Cantwell.

Postharvest Calendar
February 6-8, 2013.  Fruit Logistica.  Berlin, Germany
March 18-19, 2013. 19th Annual Fruit Ripening & Retail Handling Workshop.  UC Davis campus.
April 9-12, 2013.  InsideFood Symposium. Leuven, Belgium
April 23-24, 2013. 35th Annual Citrus Postharvest Pest Control meeting. Santa Barbara, California.
April 28-May 2, 2013.  II International Symposium on Discovery and Development of Innovative Strategies for Postharvest Disease Management. Kusadasi, Turkey
June 3-7, 2013. XI International Controlled and Modified Atmosphere Research Conference. Bari, Italy
June 17-28, 2013. 35th Annual Postharvest Technology Short Course. UC Davis
September 2-5, 2013. VI International Conference on Managing Quality in Chains MQUIC 2013. Cranfield, United Kingdom
September 17-19, 2013. 18th Annual Fresh-cut Products: Maintaining Quality & Safety Workshop. UC Davis campus
June 10-13, 2014. V International Conference Postharvest Unlimited. Lemesos, Cyprus
June 16-27, 2014. 36th Postharvest Technology Short Course. UC Davis
August 27-22, 2014. XXIX International Horticultural Congress. Brisbane, Australia
September 16-18, 2014. 19th Fresh-cut Products: Maintaining Quality & Safety. UC Davis

Ask the Produce Docs

Q. I am writing this email from South America where I am an agricultural engineer. I specialize in perishable logistics. Five years ago I bought your transportation series which I use constantly.

We export in containers, cut flowers, tropical fruits, and vegetables, but exporters do not fill the entire container (consolidation), so this increases the cost of exports. I want to know where to get technical literature on strategies to consolidate where possible containers of various tropical products without damaging the items. (A.E.)

A. If I understand your question correctly, you would like to know how to setup a load of mixed produce including flowers that are compatible with each other.

The refrigerated trailer book has a section on pages 3 - 5 that describes how to set up a mixed load of fruits and vegetables. Cut flowers should be considered an ethylene sensitive commodity and grouped with the top group of ethylene sensitive fruits and vegetables. There is one exception to this and that is flowers that have been treated to make them insensitive to ethylene. They can be treated like the middle rows of produce that are not sensitive to ethylene. If you are not sure, then be safe and assume the flowers are ethylene sensitive.

Most flowers should be held at 0 - 2°C and grouped in the first temperature column. Tropical origin flowers may be injured by these low temperatures and should be grouped with items held at warmer temperatures.

-Jim Thompson

If you have a perplexing postharvest question that you’d like answered, please send it to postharvest@ucdavis.edu
